# AUSTRALIAN COAL RESOURCES

SCALE 1:10 000 000  
0 100 200 300 400 500 Kilometres

LAMBERT CONFORMAL CONIC PROJECTION  
Central Meridian: 134°E Standard Parallels: 18°S, 36°S  
Geocentric Datum of Australia

- Brown coal**
- ★ Operating mine
  - Deposit
  - Sedimentary basins with up to 1 billion tonnes of coal
  - Sedimentary basins with 1 to 10 billion tonnes of coal
  - Sedimentary basins with 10 to 500 billion tonnes of coal
  - Sedimentary basins with more than 100 billion tonnes of coal
- Black coal**
- ★ Operating mine
  - Deposit
  - Sedimentary basins with up to 10 million tonnes of coal
  - Sedimentary basins with 10 to 100 million tonnes of coal
  - Sedimentary basins with 100 to 1 billion tonnes of coal
  - Sedimentary basins with 1 to 10 billion tonnes of coal
  - Sedimentary basins with more than 10 billion tonnes of coal

Compiled by M.B. Huleatt, S. Jaireth  
Cartography by G.A. Young, V.A. Cooper

Published by Geoscience Australia, Department of Resources, Energy and Tourism, Canberra, Australia. Issued under the authority of the Minister for Resources, Energy and Tourism

Copies of this map may be downloaded from the Geoscience Australia website at: <http://www.ga.gov.au>

This map is based on information compiled from publicly available sources on some 327 Australian deposits with coal resources, including world-class deposits. Compilation of data is ongoing

Resources for each basin represent aggregates of resources in deposits. Resources are derived by summing the aggregate production and the current remaining resources. Basins defined here are based on Geoscience Australia's Geobasins arcinfo coverage. Resources for some deposits are assigned to the closest basin

Location information used in this map is derived from Geoscience Australia's Ozmin database for deposits

It is recommended that this map be referred to as: Huleatt, M.B., Jaireth, S., 2009. Australian Coal Resources, October 2009 Edition, 1:10 000 000 scale map, Geoscience Australia, Canberra, Australia
