Dear Premier Bligh,

Bimblebox Nature Refuge was saved from land-clearing in 2000, but is now threatened by Waratah Coal's proposed "China First" mine. A Nature Refuge Agreement was signed to protect Bimblebox 'in perpetuity', making it part of the National Reserve System. Astonishingly however, neither state nor federal legislation guarantees protection for Nature Refuges from exploration and mining.

Please do all in your power to ensure that the rich biodiversity and intact carbon stores on Bimblebox Nature Refuge are not sacrificed for the sake of digging up more climate changing coal.

Yours sincerely,
